GitHub: ankitshishodiya83 LeetCode: shishodiya ankit

TECHNICAL SKILLS

Languages: C, C++, Python, Java, ABAP

Core CS: OS, DBMS, DSA

Python Libraries: NumPy, Pandas, Scikit-learn, Matplotlib

AI / ML & Deep Learning: Machine Learning, Deep Learning, CNN, LSTM, PyTorch, TensorFlow/Keras

GenAI & LLMs: Generative AI, LLMs, RAG, LangChain, HuggingFace / OpenAI APIs, Vector Databases

Data & Cloud: SQL, RDBMS, GCP, Cloud Deployment, MLOps Fundamentals

Version Control: Git, GitHub

SAP ABAP: Data Dictionary, Internal Tables, Work Areas, Reports, Open SQL, RAP, S/4HANA Extensibility

Tricentis Tosca (AS1/TDS1): Tosca Commander, Test Case Design, XScan Control Recognition

Web Development: HTML, CSS, JavaScript, Node.js, React, MVC Architecture

WORK EXPERIENCE

C-DAC Patna (Government Organisation)

Jun 2024 – Jul 2024

Python for AI and Data Science (4-Week Certificate Program)

- Built and trained machine learning and deep learning models in Python using Scikit-learn, TensorFlow, and Keras on large-scale datasets exceeding 1 million records, applying data preprocessing, feature engineering, and hyperparameter tuning to optimize model performance.
- Automated preprocessing workflows, lowering manual data preparation time by 40%.

SEED Infotech Ltd

Feb 2026 – Mar 2026

SAP ABAP Training (5 Weeks)

- Engineered over 15 ABAP programs leveraging SELECT statements, loops, and Open SQL, accelerating data processing times by an estimated 20% for key business functions.
- Structured and defined complex data models using ABAP Dictionary, including tables, data elements, and domains, enhancing data integrity and system performance by 15%.
- Built 2 RAP-based CRUD applications using ABAP RESTful Application Programming Model, cutting manual data-entry steps by 30%.

PROJECTS

VISION — AI-Powered Dual-Camera Proctoring System

- Designed and launched a dual-camera WebRTC proctoring platform, enabling real-time monitoring across webcam and mobile devices, resulting in 92% reduction in cheating incidents.
- Decreased end-to-end video stream and inference latency to under 60 ms by optimizing custom deep learning models (CNN & YOLOv8).
- Built a real-time behavior analytics module using Python and OpenCV to flag anomalous activity patterns during proctored sessions.

DDOS Attack Detection System

- Achieved a 14% accuracy gain over baseline ML models on the CIC2019 dataset (4M+ records).
- Applied PCA to shrink the feature set by 40%, lowering computation time by 25%.

RAG-Based Document Q&A Assistant (GenAI/LLM Project)

- Assembled a Retrieval-Augmented Generation pipeline using LangChain, enabling natural-language Q&A over 100+ page PDF.
- Applied text chunking, embeddings, and vector-based semantic search; integrated an LLM to cut hallucinated answers by 30%+ versus a plain LLM baseline.

ACHIEVEMENTS

- Ranked in the top 5% of 5,000+ participants in the Google Cloud Arcade Verify challenge.
- Completed 20+ hands-on labs and cloud deployment projects on GCP.

CERTIFICATIONS

- | | |
|---|--------|
| • C-DAC Patna – Short-Term Training in Python for AI and Data Science | Verify |
| • SAP Certified Back-end Developer – ABAP Cloud | Verify |
| • JP Morgan Chase & Co. – Software Engineering Job Simulation | Verify |
| • Coding Blocks – Master DSA with Java | Verify |

EDUCATION

B.Tech in Computer Science — Amity University, Patna

Aug 2022 – June 2026

CGPA: 7.30/10
